FOR IMMEDIATE RELEASE

UNITED SUPPORT SOLUTIONS, INC. CELEBRATES SOLAR PANEL INSTALLATION

Cedar Grove, New Jersey – United Support Solutions, Inc., a northern NJ defense manufacturer, and Cadmus Solar, LLC, a world leader in renewable energy technology and implementation, celebrated the Phase I installation and activation of United Support Solutions' first Photovoltaic Solar and Solar Thermal System.

Phase I comprised the installation of 90 mounted solar panels on the roof of United Support Solutions' manufacturing facility. Phase II will be completed early fall 2010 and add 80 solar panels implementing solar thermal energy.

The patented C-Solar System is funded, owned, and operated by Cadmus Solar with the support of New Jersey's Clean Energy Program. United Support Solutions will then purchase from Cadmus Solar the electricity generated from the system at a fixed price.

The compelling environmental and financial benefits made the decision to install the solar system easy. This solar system annually produces 112, 217 kwh of clean energy, and reduces annual greenhouse gas emissions by 235,095 lbs, 213 lbs of smog emissions, and 415 lbs of acid rain emissions.

United Support Solutions has embarked on an environmental responsibility strategy as the importance of protecting our environment and reducing costs escalates. Various green initiatives in recycling, lighting, heating, and cooling systems have been implemented at United Support Solutions facility, combined with an Environmental, Health, and Safety Program.
